San Jose, CA

Education

Arizona State University — Tempe, AZ
Master of Science in Computer Science; GPA: 4.0/4.0 — *May 2026*

Vidyalankar Institute of Technology — Mumbai, India
Bachelor of Engineering in Information Technology; CGPA: 9.14/10 — *May 2022*

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS, Bash
AI/ML: LangChain, LangGraph, Ollama, vLLM, RAG, PyTorch, TensorFlow, OpenCV, Scikit-learn, Pandas
Web Frameworks: Vue.js, React, Node.js, FastAPI, Django, Flask, Socket.io
Cloud & Tools: AWS (SageMaker, Lambda, EC2), Docker, Git, Linux, Vercel, Postman
Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Experience

Software Engineering Intern — June 2025 – Aug 2025
Vera Beauty Inc. — *Tempe, AZ*

- Engineered an in-house computer vision model to extract facial structural ratios, integrating it into the onboarding flow to drive personalized aesthetic procedure recommendations.
- Collaborated with the Lead Engineer to architect an Airbnb-style platform enabling users to research and book med-spa treatments across the U.S.

Software Engineer (SDE-I) — Sept 2022 – June 2024
Jio Platforms Limited — *Mumbai, India*

- Developed and deployed large-scale facial recognition and fraud detection systems, analyzing data from **42M+ users**.
- Boosted verification accuracy from 75% to **96%** by enhancing facial embeddings (128D → 512D) using InsightFace and OpenCV, preventing multimillion-dollar penalties in fraudulent SIM registrations.
- Designed end-to-end ML pipelines for a Digital Asset Management platform, integrating Detectron2 (Object Detection) on AWS SageMaker and PyTorch FER (Emotion Detection).
- Optimized image retrieval speed by **5x** using Elasticsearch and cosine similarity, achieving 95%+ tagging accuracy while resolving critical storage bottlenecks.
- Led a 10-member team for data labeling while managing model containerization via Docker and AWS Lambda.

Projects

Wordle Royale | *Vue.js, Node.js, Socket.io, WebSockets* — Jan 2026

- Architected a live multiplayer Battle Royale using **Vue.js**, **Node.js**, and **Socket.io** for sub-millisecond, bi-directional state synchronization.
- Engineered complex game mechanics including circular target logic and dynamic looting.

Nike Bot | *LangChain, vLLM, Ollama, Python, SQL* — Nov 2025

- Architected an **agentic AI** workflow using **LangChain** and open-source **LLMs** (served via **vLLM** and **Ollama**) to interpret natural language and execute multi-step reasoning for personalized recommendations.
- Built an automated ETL pipeline to sync real-time inventory and trigger instant user alerts for price drops and availability changes.

Leadership & Extracurricular

Graduate Student Assistant (Intro to AI) — Jan 2025 – May 2026
Arizona State University — *Tempe, AZ*

- Support 120+ students in CSE 471, simplifying complex AI concepts and mentoring students through office hours.

Chairperson — Aug 2019 – June 2021
ACM Student Chapter, VIT — *Mumbai, India*

- Led a 40-member team to organize 15+ technical workshops and hackathons, engaging over 200 participants.
