Mohit Jain

San Jose, CA | +1 602-883-5286 | mohit270900@gmail.com | linkedin.com/in/mohitjain-27 | portfolio-mohit-jain.vercel.app

Education

Arizona State University — Tempe, AZ
Master of Science in Computer Science; GPA: 4.0/4.0 — *May 2026*

Vidyalankar Institute of Technology — Mumbai, India
Bachelor of Engineering in Information Technology; CGPA: 9.14/10 — *May 2022*

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS, Bash
AI/ML: LLMs, LangChain, LangGraph, RAG, Ollama, vLLM, PyTorch, TensorFlow, OpenCV, Scikit-learn, Pandas
Web Frameworks: Vue.js, React, Node.js, FastAPI, Django, Flask, REST APIs, Socket.io
Cloud & Tools: AWS (Lambda, Step Functions, API Gateway, S3, SageMaker, EC2), Docker, Git, Linux, CI/CD
Databases: PostgreSQL (Aurora), MySQL, MongoDB, Redis, Elasticsearch

Experience

AWS Cloud Developer Intern — Oct 2026 – Present
MindSpark (LEAP Consultants LLC) — *Remote*
- Architected serverless pipelines using **AWS Lambda**, **Step Functions**, **API Gateway**, and **S3**.
- Optimized **Aurora PostgreSQL** data models, indexing, and connection pooling for low-latency queries.

Software Engineering Intern — Jun 2025 – Aug 2025
Vera Beauty Inc. — *Remote*
- Built an in-house **Computer Vision (CV)** model extracting facial ratios for personalized recommendations.
- Co-architected an Airbnb-style platform for researching and booking med-spa treatments across the U.S.

Software Engineer (SDE-I) — Sep 2022 – Jun 2024
Jio Platforms Limited — *Mumbai, India*
- Developed facial recognition and fraud detection systems for **42M+ users**, boosting accuracy from 75% to **96%** using InsightFace (512D embeddings) and OpenCV to prevent fraudulent registrations.
- Designed end-to-end ML pipelines for a Digital Asset Management platform, integrating Detectron2 (Object Detection) on AWS SageMaker and PyTorch FER (Emotion Detection).
- Optimized image retrieval speed by **5x** using Elasticsearch and cosine similarity, achieving 95%+ tagging accuracy while resolving critical storage bottlenecks.
- Led a 10-member team for data labeling while managing model containerization via Docker and AWS Lambda.

Projects

Wordle Royale | *Vue.js, Node.js, Socket.io, WebSockets* — Jan 2026
- Architected a live multiplayer Battle Royale using **Vue.js**, **Node.js**, and **Socket.io** for sub-millisecond, bi-directional state synchronization.
- Engineered complex game mechanics including circular target logic and dynamic looting.

Nike Bot | *LangChain, vLLM, Ollama, Python, SQL* — Nov 2025
- Architected an **agentic AI** workflow using **LangChain** and open-source **LLMs** (served via **vLLM** and **Ollama**) to interpret natural language and execute multi-step reasoning for personalized recommendations.
- Built an automated ETL pipeline to sync real-time inventory and trigger instant user alerts for price drops and availability changes.

Leadership & Extracurricular

Graduate Student Assistant (Intro to AI) — Jan 2025 – May 2026
Arizona State University — *Tempe, AZ*
- Supported Intro to AI for 120+ students through grading, exam proctoring, course administration, and clarification of course concepts.

Chairperson — Aug 2019 – Jun 2021
ACM Student Chapter, VIT — *Mumbai, India*
- Led a 40-member team to organize 15+ technical workshops and hackathons, engaging over 200 participants.
